JOHN SALAVERIA

Front-end Developer | UI Designer
jj.salaveria@gmail.com | johnsington.me | github.com/johnsington

SKILL SET

Tech - jQuery, NodeJS, Express, MongoDB, Backbone, MVC, Git, Bash scripting
Design - Figma, Photoshop, Illustrator, InDesign, Flash Professional
Languages - JavaScript/ECMAscript 6, C++, C, Visual Basic
Markup - HTML5, CSS3, SASS/LESS, Jade, Handlebars, Markdown

WORK

Sequence, Front End Engineer — Apr - Sep 2016
- Produced a high-fidelity Assemble.io prototype for a Facebook for Business website redesign, designed and coded user interaction behaviour.
- Implemented front-end widgets from complex mockups within a custom-built content management system for Chipotle.

Monstercat, Full Stack Engineer, UI — Aug - Dec 2015
- Took full ownership of redesigning monstercat.com UI components from producing mockups to HTML prototyping to technical implementation.
- Developed an internal Slack application that enabled non-technical employees to query and export MongoDB data into a human-readable format.
- Launched a Node client-server web app for an art contest in one week.

Klick Health, Front End Web Developer — Jan - Apr 2015
- Implemented HTML email campaigns with extensive cross-browser compatibility to reach thousands of pharmaceutical consumers.

Canadian Imperial Bank of Commerce, Test Analyst — May - Aug 2014
- Responsible for executing manual tests to assure the quality of CIBC's retail banking website and mobile applications used by millions of clients.

SIDE PROJECTS

johnsington.me — Winter 2015
Redesigned the UI and software architecture of my personal website with a Jekyll-like build framework, features responsive design using HTML5, SASS, and jQuery.

#instakarma — Winter 2015
Designed and developed a responsive web app that leverages the Instagram API and AJAX methods to count the total likes of a user's most recent photos.

AWARDS

IBM Entrance Scholarship in Engineering, UW Alumni, 2013
